The Best Meme Token

Everything you need to know about our project

Son Popu White Paper

Prepared by

Lin Guanyu

ronhoffman@techpunkblue.com

Introduction

Perhaps you have spent a lot of time in the cryptocurrency space and now feel that you have the knowledge necessary to choose a new project. That's great! However, if you are not sure that our project is worthy of your attention, that this technical documentation will provide some help. In it you will find step-by-step instructions on buying NFT, PEPEG token and much more.
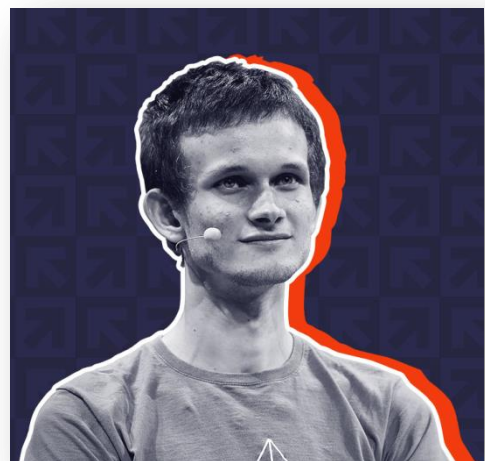

Story

Meme token Son Popu (PEPEG) created on the ETH network, which is a parody of the Dragon Ball manga, in particular on Son Goku + PEPE. Son Popu was sent to Earth to find new friends and go to the moon with them!
Grandfather Buterin taught him martial arts and gave him a four-star Dragon Ball.

Detailed analysis

Vitalik Buterin

Vitalik Buterin is one of the founders of Ethereum and the main "face" of the project. Born in Russia in a family of programmers, at the age of 6 he moved to Canada, where he grew up and received an education. Since childhood, he was fond of software development and mathematics. Buterin first introduced the Ethereum architecture at the end of 2013. Among the co-founders of the project are several people, including Gavin Wood and Joseph Lubin. Buterin still plays an important role in the community of developers of the blockchain platform, and is also one of the recognized leaders of the crypto industry.

Dragon Ball

Dragon Ball is originally a manga created by Akira Toriyama. It was published in the Japanese magazine Shonen Jump from 1984 to 1995. The official sequel to the manga is Dragon Ball: Super, published since 2015. The franchise has a bunch of movies and games. It is considered one of the most popular and well-known works in Japan and the USA. Dragon Ball had a direct and considerable influence on the genre of senen

ETH Network

Ethereum is a network consisting of many communities, as well as a set of tools that allow people to make transactions and communicate without being controlled by central authorities. To use Ethereum, there is no need to transfer all your personal data — you retain control over them and decide what to share. Ethereum has its own cryptocurrency, ether, which is used to pay for certain actions on the Ethereum network.

Tokenomics

Token Name	Son Popu
Symbol	PEPEG
Blockchain	Ethereum Mainnet
Total supply	320.000.000.000.000
Private Presale	89%
Burn	10%
Team	1%
Liquidity Pool	51%
Tax Buy/Sell	0/0
Contract Renounced	✓
Liquidity Lock	1 year

Contract

Roadmap

Phase 1

- Social Media Set-Up
- Website Live
- Contract deployment
- Release Whitepaper
- Private Presale (Partner platform PinkSale)

Phase 2

- Liquidity lock (Automatic by PinkSale)
- Launch
- Contract Renounced
- Whitelist NFT
- AMAs

Phase 3

- DEXTools/AVE/Dexview Trending
- CoinGecko/CoinMarketCap
- 1000+ Holders
- NFT Marketplace platform launch
- Made for Real Holders

Project Details «PEPEG NFT»

How stored?	Blockchain: Ethereum Mainnet NFT Standard: ERC-721A
How much?	Whitelist mint: Free! Commissions not included! (your wallet must participate in Presale) Public mint : 0.02 ETH
Amount	Only 300 Whitelist mint : 3 max per wallet Public mint : 1 max per wallet
